

Master of Science in Information Technology with Certificate in Business Analytics

The Master of Science in Information Technology with focus on Business Analytics prepares professionals for a wide range of careers in the area of business analytics.

- The combination of Business Analytics and Information Technology skills has become a driving force in today's competitive job market.
- Typical employers include financial institutions such as Bank of America or Fidelity Investments, health-care organizations such as Partners Healthcare, database marketing and market research firms such as Digitas or Epsilon, consulting firms such as Chadwick, Martin and Bailey, retailers such as Staples or Grand Circle Travel.

“Analytics careers place you at the forefront of business decisions, not in a backroom. As one of the very few people who understand the organization’s data fully, you are an invaluable professional.”

Allen Thompson,
Executive Vice-President of Global Wealth and Investment Management, Bank of America
Former Business Data Analysis student
